

Getting Libris Design 5.0 Functional on Your Computer

1. Load CD into your CD drive
2. Open “My Computer”
3. Double-click on your CD drive to see the contents of the CD
 - a. There is a file called **Libris DESIGN 5.0** and a folder called **User Help**
4. Copy the file called **Libris DESIGN 5.0** to your desktop.
 - a. You can copy the file many ways – one way is to right-click on the file, choose **Copy**, then right-click on your desktop and choose **Paste**
5. Once **Libris DESIGN 5.0** is on your desktop, right click on it and choose **Properties**
 - a. At the bottom of the Properties box, there is an option called **Read Only** Click in the box next to Read Only so that there is NO check mark in the box.
 - b. Rename your file immediately so that you will not overwrite it later.
 - c. Click **OK** to exit the Properties screen.
 - d. Double-click on **Libris DESIGN 5.0** on your desktop.
6. Once you’ve opened Libris Design and gotten to the Log In screen, as an additional protection to keep you from accidentally overwriting your work in Libris Design, you should delete the file Libris Design 5.0 from your desktop. You will work with the copy of Libris Design that you renamed in step 6.

Please Note: If you have used a previous version, find the Import Models document in the **User Help** folder on your CD to learn how to import your work from previous versions of Libris Design.

Good Luck! Don’t forget to check the website regularly and use the e-mail help and bulletin board. Save the original CD with the serial number for future upgrades.
