

Generic Library Model

Physical

Divisions
Spaces
Inventory

To determine square footage needed to accommodate all activities within the library and the costs of Inventory Items.

Collections

Collection Type
Category
Subcategory
Volumes
Shelving

To determine the square footage needed to house the Collections and the cost of purchasing shelving for the Collections.

Reports

Combine Physical and Collections information to breakdown details of the Library Building Program by:

- Costs
- Square Footage
- Divisions
- Spaces
- Collections

Budget

Calculate costs for building a library based on standard library costs and square footage. Allows for adding details of building costs and the ability to do “what if” scenarios for all aspects of building the library. Can use Libris Design figures of square footage and cost basis or not.
